

PRIVATE WEALTH

# Fiduciary Services & Structuring

---

Group Eleven is a specialist independent provider of trustees, directors and other fiduciary services designed to achieve the long term goals of its clients. We have been entrusted by some of the world's most discerning families to help structure and administer their private wealth for over 25 years.

Working with high net worth families and individuals, and their advisors internationally, we put in place structures that protect and enhance wealth for future generations as well as guard against political risk and economic uncertainty.

With many families and entrepreneurs having an increasingly global footprint, effective structuring has never been more important. From the choice of structure to the amount of involvement the family wish to have on an ongoing basis and cross-border taxation issues, it is essential that clients receive good advice before putting a structure in place.

At Group Eleven we work closely with our clients to ensure that any structure is right for their needs and that they fully understand the nature of the structure. Usually, we will work with highly experienced lawyers and tax advisors to achieve this, either using the clients trusted advisors or sourcing the appropriate professional from our panel of trusted advisors.

One of the first things to establish is the type of structure to be created such as a trust, foundation, company, private trust company or partnership to structure their wealth. We can provide an introduction to each of these structures which will help to frame discussions moving forward.

The optimum wealth holding structure is likely to depend upon a combination of factors unique to the family including the objectives for creating a structure, the location and type of assets that will be placed into the structure and where the client is resident. At Group Eleven, we have considerable experience of working with a wide variety of clients that helps us to find the right solution.
